

# Vision Mission Goals

## *Our Vision*

Through our response to their needs and the space we provide, every member of the public will recognize SPL as an essential resource for personal aspirations and community development.

## *Our Mission*

The Stratford Public Library is a community-owned organization committed to the open provision of library resources and services that will enhance personal and community quality of life.

## *Our Goals*

Every individual in the community, regardless of age or ability will be encouraged to receive, and will have access to, open provision of library resources.

Community organizations and associations will have access to open provision of library resources and will be encouraged to work together with the Library in pursuit of common objectives.

The community will be served by a library facility that enables and enriches the open provision of library resources and services in order to enrich personal and community quality of life.

The community will benefit from a library (including staff, board and associate groups) that has transformed itself into a learning organization that will respond to the needs of the community.
